EXPERIENCE

Lead Front-End Developer

08/2018 - 02/2026

Lux Interactive

Troy, MI - Remote

- Served as de facto front-end lead on a 2.5-year HR/Payroll Management System build (React, Redux), was shipping 100+ modules deployed across enterprise client organizations. Learned React on the job and grew into ownership of the codebase as other developers rotated on and off, including onboarding and mentoring a junior developer through his ramp-up.
- Architected and shipped a passenger flight management system (Angular, NgRx, RxJS, .NET Core, MS SQL) scaling to 10,000+ concurrent users, and optimized the underlying Navitaire flight API integration — reducing average response time from minutes to seconds and eliminating silent failures during peak booking traffic.
- Built and shipped a CPA course sales and compliance tracking platform on Sitefinity (.NET MVC, Razor, JavaScript, Aptify), authoring custom widgets that automated 20 hours per week of compliance reporting.
- Additional client work: led the front-end redesign of the Delta Museum Sitefinity site (responsive widget library that cut editor publishing time by 80%) and designed an environmental auditing platform (Angular, NgRx, .NET Core, MS SQL) used by hundreds of field auditors to process thousands of compliance audits annually.
- Learned Java and IntelliJ on the job to work on a clients project, researching and optimizing Navitaire flight API integration, cutting average response time from minutes to seconds and eliminating hidden errors on peak booking traffic.

Senior Web Developer

08/2016 - 07/2018

Spud Software Inc

Grand Blanc, MI

- Designed, built, and maintained a Time & Resource Management System (.NET MVC, Razor, JavaScript, MS SQL), replacing a legacy workflow system used daily across the organization.
- Delivered an Automotive Inventory Tool (Angular.js, .NET Core, MS SQL) that consolidated inventory across entire dealerships and reduced lookup time by 80%.

Web Developer

07/2015 - 08/2016

Statclash Inc

Troy, MI

- Shipped new functionality for a Daily Fantasy Sports platform (MVC4, Razor, HTML5) that drove a 50% increase in application efficiency.
- Implemented MVVM architecture with Knockout.js (client) and C# MVC (server) and MS SQL (DB), reducing client-side rendering time and simplifying legacy views.
- Owned UI/UX for a full site rebrand, boosting user engagement 20%.
- Contributed middle-tier and back-end features alongside front-end work, shipping multiple features across the stack.

SUMMARY

Full-stack web developer with 15+ years shipping production applications across React, Angular, and .NET Core. Architected platforms scaling to 10,000+ concurrent users, led front-end teams across multi-year engagements, and now building AI-integrated workflows with Claude Code, OpenAI, and MCP. Seeking senior or lead roles where I can own architecture decisions and grow engineering teams.

SKILLS

Tools

Visual Studio · VS Code ·
Claude Code · Azure App Service ·
Azure Blob Storage · GitHub · Git ·
Azure DevOps · Team Explorer ·
CLI · IIS · Telerik · Telerik Charts ·
Kendo UI · Material UI · Sitefinity ·
nopCommerce · Shopify · OpenAI ·
Vercel · IntelliJ IDEA

Programming

React 19 · Redux · Angular 20 ·
RxJS · NgRx · .NET 10 · .NET Core ·
.Net Framework ·
Entity Framework · Web API ·
Angular UI · Ionic · C# · VB ·
ASP.Net · MVC · Razor · T-SQL ·
Bootstrap · JavaScript · Typescript ·
Sass/SCSS · Java · Python

EXPERIENCE

Web Developer

03/2014 - 06/2015

Anthelio Healthcare Solutions

Remote

- Built and tested internal healthcare management apps (ASP.NET 4.0/4.5, MS SQL 2014) supporting patient intake, claims processing, and provider records workflows.
- Delivered N-tier features end-to-end (Services, DTO, BLL, DAL, stored procs), shipping multiple features into production.

Web Developer

04/2010 - 03/2014

QEK Global Solutions

Bloomfield Hills, MI

- Co-developed an asset management system for employee lease vehicles, tracking hundreds of vehicles across multiple locations.
- Designed, built, and tested modules for an existing fleet management web app (VB.NET, ASP.NET 4.0, MS SQL 2008) supporting hundreds of fleet managers and thousands of vehicles.
- Standardized DAL and BLL layers using table adapters, datasets, and stored procedures, producing reusable components across the application.

EDUCATION

IT Programming

03/2007 - 02/2008

American Intercontinental University

Hoffman Estates, IL

- Bachelor's in IT Programming : Acquired
- Focus: Microsoft Programming

Business Administration

02/2005 - 02/2007

American Intercontinental University

Hoffman Estates, IL

- Associates: Degree: Acquired
- Focus: Business Startup

SKILLS

Databases

MS SQL Server · Azure SQL ·

Supabase PostgreSQL ·

Relational DB Design

SIDE PROJECTS

Online Dating

04/2026 - Present

[atachy.vercel.app](#)

- Developing with Claude Code, Angular 20, .Net 10, Azure Resources

Ecommerce Projects

01/2023 - Present

[gnarlysidewalks.com](#)

- Developed with Shopify. All product images created with Midjourney
